

作文

Pollution does harm to our health,so we have to fight against it. As middle school students, we should make efforts to take part in/join in some activities about protecting the environment. First,we had better walk or ride a bike to school. Make sure that we turn off the lights when we leave the classroom.Besides, it's better to look after our pens and rubbers well. It is necessary to save paper.At last,we are supposed to take our own bag when shopping instead of asking for a plastic bag./It's a great idea to use china cups instead of paper cups./Remember to use less electricity as much as possible.

As far as I am concerned,In my opinion, if everyone takes these simple steps today,the world will be saved in

the future.
